

Industrial Air Compressor Solutions

- PM VFD Screw Compressors
- Two-stage Screw Compressors
- Laser Cutting Air Compressor Systems

Reliable compressed air solutions for manufacturing, metal fabrication, laser cutting, oil & gas, mining and industrial applications.

Product Selection

Quotation

Distributor Cooperation

Common Compressed Air Problems

We Help You Solve

Customer Pain Points

High electricity cost

Unstable air pressure

Complicated system matching

Difficult maintenance

Lack of spare parts support

Slow after-sales response

No reliable supplier for long-term cooperation

Jetskay Solutions

PM VFD energy-saving air compressors

Stable compressed air output for production

Integrated system options for laser cutting

Remote monitoring optional

Spare parts and technical documents

Distributor support and after-sales communication

OEM and branding support for local partners

We help factories and distributors get the right compressed air solution, not just a single machine.

About Jetskay

Jetskay is a China-based supplier of industrial air compressor solutions. We provide PM VFD screw air compressors, two-stage screw air compressors, integrated air compressor systems for fiber laser cutting machines, and piston air compressors.

Our products are designed for manufacturing plants, metal fabrication workshops, laser cutting users, food and beverage production, oil and gas, mining and general industrial applications.

Based in Xiamen, China, **Jetskay** supports overseas customers with product selection, technical documents, spare parts, OEM/branding options, export logistics and after-sales communication. We are looking for reliable distributors, industrial equipment partners and service companies in global markets.

Xiamen, China

Our home. Your partner

Reliable Solutions

Built for performance and durability

Advanced Technology

Energy-saving and high efficiency

Global Partnerships

Growing together for long-term value

Product Selection

Right solution for your application

Technical Documents

Complete manuals and certification support

Spare Parts

Reliable parts supply and quick response

OEM/Branding

Custom branding and OEM options available

Export Logistics

Safe packing and global shipping support

After-Sales Support

Responsive service and long-term partnership

**BUILT IN CHINA.
DELIVERED GLOBALLY**

Quality compressors. Global support.

Our Main Product Lines

Reliable compressed air solutions engineered for efficiency, durability and a wide range of industrial applications.

Reliable Solutions

Built for performance and durability

Advanced Technology

Energy-saving and high efficiency

Global Partnerships

Growing together for long-term value

01

PM VFD Screw Air Compressor

Energy-saving compressed air solution for factories.

Suitable for : manufacturing, packaging, metal processing and general industrial workshops.

02

Two-stage Screw Air Compressor

Efficient solution for heavy-duty industrial applications.

Suitable for : continuous operation, large factories, oil and gas, mining and engineering projects.

03

Integrated Air Compressor System for Fiber Laser Cutting Machines

Compact air supply system for laser cutting applications.

Suitable for : laser machine distributors, CNC dealers and metal fabrication workshops.

04

Piston Air Compressor

Cost-effective compressed air option for small workshops and maintenance markets.

Suitable for : small factories, repair shops and light-duty applications.

From standard factory air supply to laser cutting and heavy-duty industrial applications, Jetskay provides flexible product options for different markets.

PM VFD Screw Air Compressor

Energy-saving compressed air solution for industrial factories.

Jetskay PM VFD screw air compressors are designed for factories with variable air demand. Compared with traditional fixed-speed compressors, PM VFD technology can help reduce energy consumption under changing working conditions while maintaining stable air pressure for continuous production.

KEY SELLING POINTS

-  PM VFD technology for energy-saving operation
-  Stable pressure output for production lines
-  Low noise and low vibration design
-  Intelligent control system
-  Suitable for continuous industrial use
-  Good choice for factory energy-saving projects

RECOMMENDED APPLICATIONS

General
manufacturing

Metal
fabrication

Food
packaging

Automotive
parts

Plastics

Textile and
printing

service companies

Send us your required pressure, air flow and voltage.
We will recommend a suitable model.

Integrated Air Compressor System for Fiber Laser Cutting Machines

Stable and clean compressed air for laser cutting applications.

Air Compressor System for Laser Cutting

Jetskay integrated air compressor systems are designed to support fiber laser cutting users with stable compressed air. The system combines compressed air supply, air storage, drying and filtration support in one compact solution, helping users simplify installation and improve cutting air stability.

Important : This product is an integrated air compressor system for fiber laser cutting machines. It is **NOT** a laser cutting machine.

SYSTEM STRUCTURE OVERVIEW

All-in-one solution for stable and clean air for fiber laser cutting machines.

KEY SELLING POINTS

Integrated compressor and air tank design

Drying and filtration support

Stable air pressure for cutting operation

Compact structure and easy installation

Suitable for metal fabrication workshops

Good product for laser machine distributors

Convenient for after-sales replacement market

RECOMMENDED CUSTOMERS

Laser cutting machine distributors

CNC machinery dealers

Metal fabrication workshops

Advertising sign manufacturers

Sheet metal processing factories

Industrial equipment suppliers

Contact us for product sheet, model recommendation and distributor price.

Two-stage Screw Air Compressor

Efficient solution for heavy-duty industrial applications.

Jetskay two-stage screw air compressors are designed for demanding industrial applications where stable compressed air and continuous operation are required. With two-stage compression design, this product line is suitable for high-load working conditions and industrial projects that require reliable compressed air supply.

KEY SELLING POINTS

Two-stage compression design

Suitable for continuous operation

Stable compressed air output

Designed for high-load working conditions

Reliable choice for industrial projects

Suitable for large factories and heavy-duty workshops

Typical model range available

90_{Kw}

110_{Kw}

132_{Kw}

185_{Kw}

250_{Kw}

RECOMMENDED APPLICATIONS

Oil and gas

Mining

Steel structure

Large manufacturing plants

Engineering projects

Heavy-duty industrial workshops

RECOMMENDED APPLICATIONS

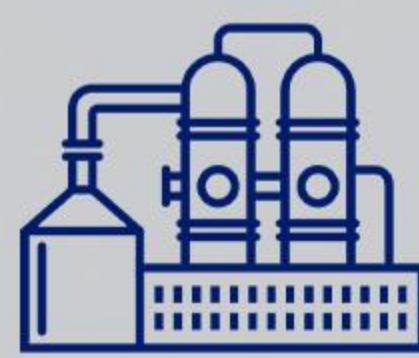

Industrial project contractors

Oil and gas equipment suppliers

Mining equipment companies

Large factory buyers

Industrial air compressor distributors

Tell us your working pressure, air flow and operating environment.
We will provide a suitable solution.

Applications We Serve

Compressed air solutions for different industries and working conditions.

General Manufacturing

Need stable compressed air for daily production.

Recommended

PM VFD Screw Air Compressor

Metal Fabrication

Need reliable air supply for cutting, polishing, tools and workshop equipment.

Recommended

PM VFD Screw Air Compressor / Laser Cutting Air System

Laser Cutting

Need clean and stable compressed air for cutting quality.

Recommended

Integrated Air Compressor System for Fiber Laser Cutting Machines

Food & Beverage

Need stable air supply for packaging, handling and production support.

Recommended

PM VFD Screw Air Compressor

Oil & Gas

Need reliable compressed air for demanding industrial projects.

Recommended

Two-stage Screw Air Compressor

Mining

Need durable air supply under harsh working environments.

Recommended

Two-stage Screw Air Compressor

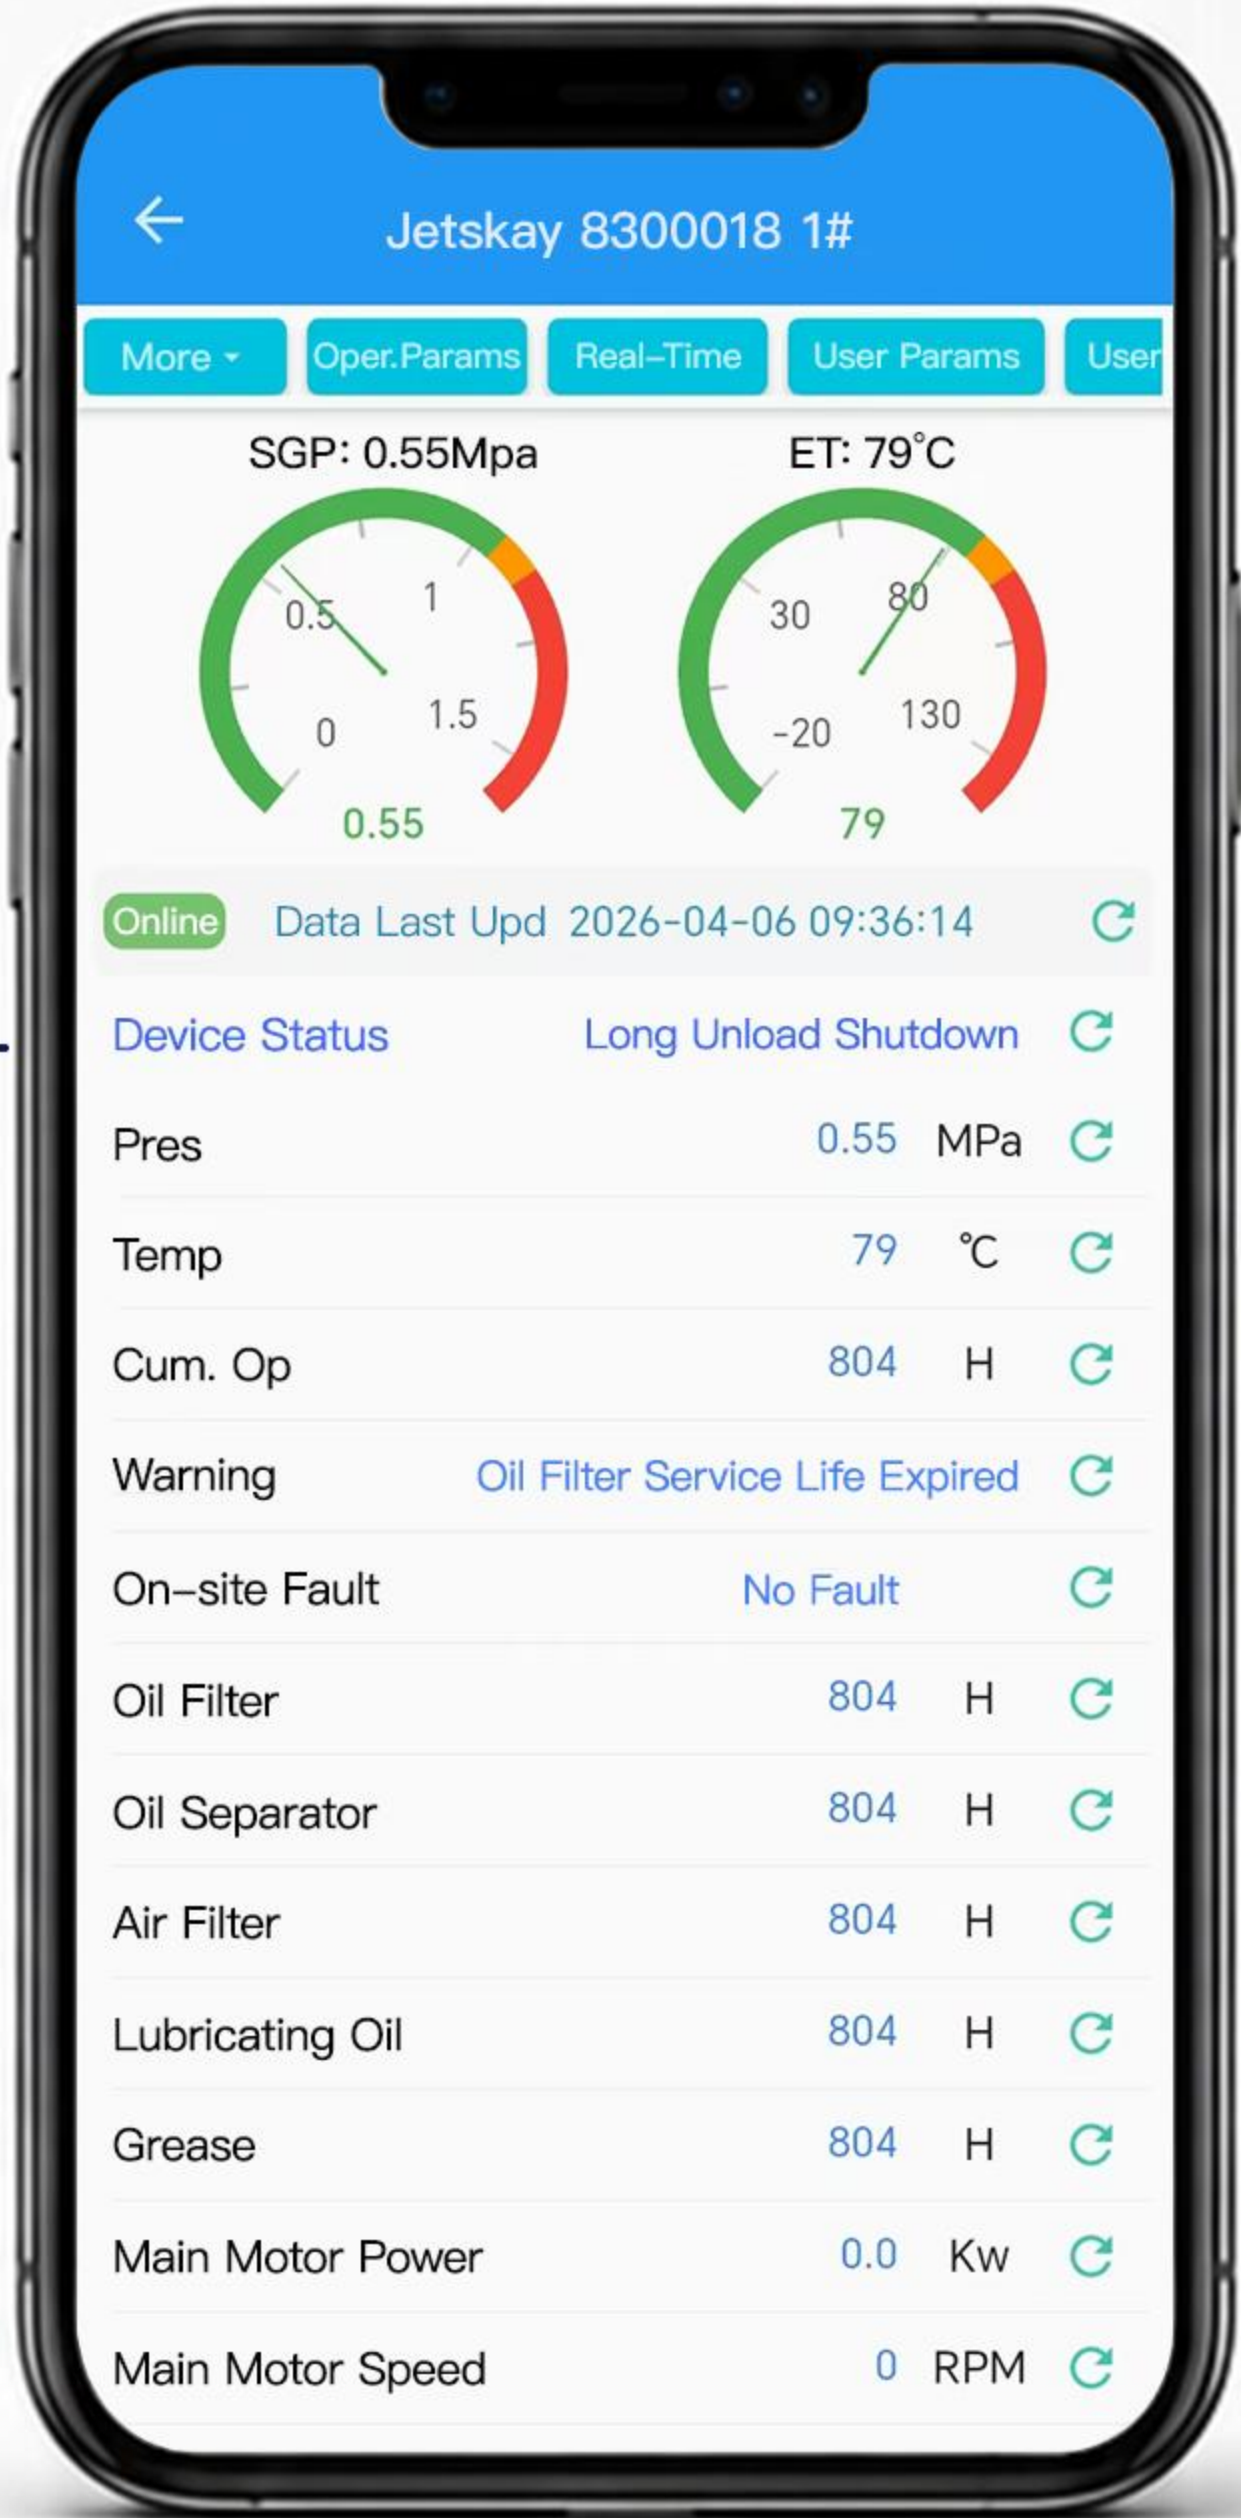

Different industries require different air pressure, air flow and air treatment configurations. **Jetskay** can support product selection according to your

Smart Monitoring & Service Support

Remote monitoring optional for better equipment management.

Jetskay supports intelligent air compressor management for selected models. With remote monitoring and data viewing functions, users and service partners can check operating status, receive fault warnings and improve maintenance efficiency.

Remote Monitoring Optional

KEY FUNCTIONS

- Remote operating data viewing
- Fault warning
- Maintenance reminder
- Parameter checking
- Mobile notification
- Service support for distributors

CUSTOMER BENEFITS

- Reduce maintenance pressure
- Help distributors respond faster
- Improve equipment management
- Support long-term stable operation
- Make after-sales service easier

Remote monitoring is optional and can support distributors in after-sales service management.

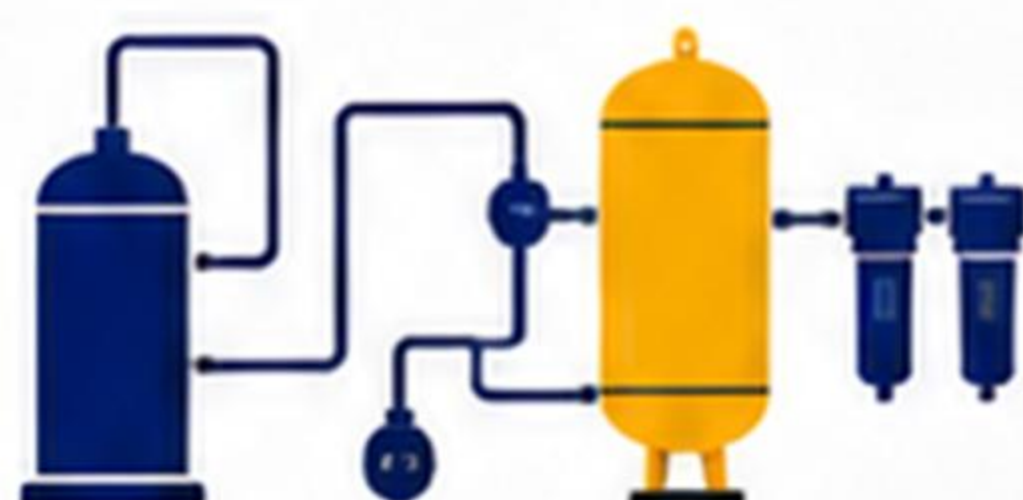

Why Work with Jetskay

Practical support for overseas distributors and industrial customers.

1. Energy-saving Compressor Solutions

PM VFD screw compressors for factories with variable air demand.

2. Integrated System Options

Air compressor systems for laser cutting applications, with air storage, drying and filtration support.

3. Multiple Product Lines

PM VFD screw compressors, two-stage compressors, laser cutting air systems and piston compressors.

4. OEM / Branding Support

Flexible cooperation for distributors and local market partners.

5. Spare Parts Supply

Consumables and spare parts support for long-term cooperation.

6. Technical Documents & Remote Communication

Product sheets, parameters, maintenance guidance and after-sales communication.

7. Export Logistics from Xiamen

Convenient shipment support from Xiamen, China.

Jetskay aims to support partners with products, documents, spare parts and long-term cooperation, not only one-time sales.

Distributor Partnership

Looking for reliable local partners in global markets.

01

WHO WE WORK WITH

Air compressor distributors

Industrial equipment suppliers

Compressed air service companies

Laser cutting machine distributors

CNC machinery dealers

Factory maintenance service companies

02

WHAT WE SUPPORT

Distributor pricing

Product catalogues and sales materials

Technical documents

Spare parts support

OEM / branding options

Remote technical communication

03

COOPERATION PROCESS

1

Send inquiry

2

Confirm target models

3

Receive quotation

4

Trial order or sample discussion

5

Technical documents and product training

6

Local market cooperation

7

Long-term distributor development

Important Note

Exclusive distribution can be discussed based on trial order, annual target and local service capability.

Contact us to discuss distributor cooperation in your market.
